Application information				
Description of application				
Quantity required		Quote t	ype required (bud	lgetary or formal)
What is the budget?		.		atus/install date?
			. ,	
Product description				
Belt width		Belt speed		Belt capacity
Maximum burden depth		•	Pro	duct bulk density
Troughing idlers angle				eyor incline angle
Magnet suspension height fro				tion (if >3,000 ft.)
	Min.	Max.		
Product size				Cross Inline
Ambient temperature				
Target ferrous metal size			>>C	onveyor flow>>
. G				
Installation location		If inline, please an	swer the followin	g two questions:
Head pulley material		•	l pulley diameter	<u>. </u>
, and passey masses and			, , , , , , , , , , , , , , , , , , , ,	
Magnet requirements				
Method of cleaning				
Preferred magnet type				
If magnet is self-cleaning, please an		g questions:		
Power input motor	Swer the ronowing	5 questions:	7ero snee	d switch required
Special motor requirements			2010 3900	a switch required
Special motor requirements Special belting requirements				
If magnet is electro, please answer	the following gue	stions		
ii magnet is electro, please answer	the following ques			
	_		er input rectifier	
_		nclosure rating (NE	•	
High flash point silicone transformer liquid required				
CANAGE				
Notes
